

Matthew Meents

Senior Software Engineer • Remote • github.com/mmeents • linkedin.com/in/mmeents

PROFESSIONAL SUMMARY

Senior Software Engineer with 15+ years of experience building cloud-native CRM, lead generation, and data pipeline systems in C# / .NET and Azure. Proven team lead with a track record of delivering distributed, high-throughput systems at scale — from real-time customer communication platforms to ETL data workflows. Experienced across the full stack with a strong bias for clean architecture, measurable outcomes, and staying ahead of the technology curve, including hands-on work with AI/LLM tooling and MCP-based agentic systems.

EXPERIENCE

Groundworks | *Senior Software Engineer (Remote)* 7/2022 – 3/2026

CRM and Lead Generation Systems — \$1Bn+ Leading Construction Services Company

- Led a team of 4 developers across time zones, orchestrating sprint planning, code reviews, and cross-team delivery.
- Designed and deployed Azure-based CRM applications integrating phone, email, and SMS APIs for high-volume customer interactions.
- Built the automated lead routing system that pipes inbound leads into CXOne, Cordial, and Twilio queues in real time.
- Architected proprietary backend systems using C#, Azure App Services, Azure Service Bus, SQL Server, and CI/CD pipelines.
- Collaborated with Marketing to continuously optimize the lead generation system, directly supporting business growth objectives.
- Rotated as cross-team contributor during a company-wide platform modernization initiative — embedded with the Frontend team delivering Angular and EF Core feature work across weekly sprints, then transitioned to Data Engineering applying Python and PySpark for ETL pipeline development.

CryptoSlam, Inc. | *Senior Software Engineer (Remote)* 2/2022 – 6/2022

API and Full-Stack Development — NFT Analytics Platform (CryptoSlam.io)

- Built and deployed .NET Core APIs and web applications to Linux AWS Elastic Beanstalk environments via Bitbucket CI/CD pipelines.
- Applied MS SQL, MongoDB, and NoSQL data patterns in a fast-moving startup environment with Jira-driven sprint cadence.

Zenalytics, LLC. | *.NET Developer (Part-Time, Remote)* 1/2019 – 2/2022

Data Analysis and Media Campaign Reporting

- Developed custom MS SQL database to consolidate ad server logs and produce key analytical exports supporting media campaign reporting.

Blue Sky MLS, LLC. | *Software Development Lead* 5/2015 – 9/2018

API and Full-Stack Development — State SEC Registration Platform

- Managed a team of 4 developers including hiring, onboarding, and sprint management.
- Built online registration ordering platform using C#, ASP.NET, SignalR, Bootstrap, and SQL Server.
- Developed automated asset sales data feed import system with SFTP download scheduling and database integration.
- Implemented electronic filing system integrating with Blue Express API for state-level regulatory registrations.
- Built fund sales calculator and enhanced permit tracking system serving clients including Schwab and BNY Mellon.

ALM Media, Kenexa (IBM via acquisition) | Senior Developer → Lead Developer 5/1997 – 3/2015
Full-stack development across legal case management (C#, MS SQL) and HR platform products (Delphi, VBScript, MS SQL).

TECHNICAL SKILLS

Languages & Frameworks: C#, .NET / ASP.NET Core, Python, PySpark, Angular, TypeScript, JavaScript, SQL

Cloud & DevOps: Azure App Services, Azure Service Bus, App Insights, AWS Elastic Beanstalk, CI/CD, Azure DevOps, Git, GitHub, Bitbucket

Data: SQL Server, Entity Framework Core, MongoDB, NoSQL, Stored Procedures, SSMS

APIs & Integrations: REST / Web API, JSON, XML, SignalR, Twilio, CXOne, Cordial, SMTP, EWS, SFTP

AI / Emerging: MCP (Model Context Protocol), LLM tool integration, agentic workflow design

Other: Bootstrap, HTML5, CSS, IIS, Windows Services, Jira, Confluence, MS Teams

OPEN SOURCE PROJECTS

- **WeaversGuild** — LLM toolset App, Api, MCP, similar to Storytime but is oriented towards C# and EF Core, following Storytimes' principals, Structured Agents building out libraries of EF Core databases so far.
github.com/mmeents/WeaversGuild
- **Storytime** — LLM tool set, App, Api, MCP; targeting Anthropic's Claude and LM Studio(local models) focus is structured schedulable agents writing scenes and stories as a production organization.
github.com/mmeents/Storytime
- **DaemonsMCP** — LLM tool server providing MCP protocol integration for files, items, and models — actively used in agentic AI development workflows. github.com/mmeents/DaemonsMCP
- **Algos** — WYSIWYG local Mermaid.js script editor for interactive diagram authoring.
github.com/mmeents/Algos
- **AppSmith** — Next-gen database workshop model and schema maker. github.com/mmeents/AppSmith
- **DBWorkshop** — SQL Server schema introspection tool for automated code generation.
github.com/mmeents/DBWorkshop
- **FileTable** — NuGet library implementing generic tables using MessagePack serialization.
github.com/mmeents/FileTable
- **Prompter** — Desktop app for building and managing complex AI prompt trees.
github.com/mmeents/Prompter

EDUCATION

Computer Science • University of Nebraska–Lincoln
